

Resident Studios

Description:

We have three recording control rooms and four rehearsal rooms, sonically isolated and acoustically treated to give the very best creative environment in a purpose built studio block. Clients range from mainstream indie/rock bands to classical and specialist dance projects. We can provide specialist voiceover facilities and post production solutions - jazz musicians and international artists are frequent visitors.

We take the recording process very seriously, and are experts in drum and guitar tracking and microphone placement. The mix can be routed through analog or digital desks via our state-of-the-art Digidesign Pro Tools HD3 Accel system, whilst our mastering studios can provide the final polish to your song, finalized onto DAT, CD or DVD media or now streamed directly through our broadband internet link. Our larger rehearsal rooms have both wooden floors and mirrors and can also be put to use for choreography and dancing rehearsal.
